SV-8

8-INCH, TWO-WAY, PASSIVE LOUDSPEAKER SYSTEM

The SV-8 is a high-output, compact and versatile two-way system designed to fulfil a wide range of professional sound reinforcement requirements. Its highly refined, clean and balanced sound signature enables listening for hours without fatigue. Extensive development work has taken place on the phase-aligned passive crossover to ensure that the speakers do not rely heavily on DSP correction. They simply sound great even in direct plug-and-play situations.

Ideal for near-field main PA reinforcement with a Fane Pro Audio SV series subwoofer, it is simple to use as a portable system or for permanent installations. The premium Fane 8" (2" voice coil) LF driver has been seamlessly blended with a 1" exit compression driver featuring a titanium diaphragm, mounted on a 80° x 60° constant directivity horn that delivers amazing audio over both short and medium throw distances in venues such as bars, clubs, houses of worship and auditoriums.

The SV8 is fitted with a powder coated protective steel, hexagon pattern, grille fitted with an acoustic mesh backing and constructed from void-free birch plywood with tongue and groove assembly for maximum strength. Finished in black RockTex paint as standard, the SV8 can also be supplied in high-gloss 'piano black', 'piano white' or white 'RockTex' finishes, perfect for an extra touch of class in elegant high-end bars, clubs and offices.
